D 158 | Votes are not the whole approval

FICTIONAL offline arithmetic and review table. No real meeting, notice, resolution, investor contact, legal advice, account or spend.

Fixed board toy	Two founder, two investor and one independent seats. One vote per attending director; ordinary affirmative threshold fixed at three even when attendance changes. No casting vote, vacancy, conflict, written consent or abstention rule inferred.
Separate quorum	Initial quorum: three directors including one investor. Stipulated fallback: three without an investor only after proper notice and adjournment, for ordinary matters only. Numeric votes cannot cure missing quorum or required notice.
Separate rights	Preferred holdings A 1000000/B 500000; strict pooled majority requires 750001 whole affirmative votes, separate majority EACH requires 500001 A and 250001 B. A holder with 251000 B can block separate-series consent while pooled consent may pass.
Separate outputs	Board vote, quorum, pooled/series choice and required preferred approval have separate flags. Combined toy gate is only the conjunction of those stipulated rules. Legal enforceability/mandatory approval is UNKNOWN, never a computed yes.
Conditional review	Twelve fictional reserved matters are inputs, not universal standard rights. Approval mode and whether preferred consent is required must come from the case terms, not amount or investor seat count alone. No automatic deemed consent after a deadline.
Boundaries	Equality at debt 2 crore and related-party 25 lakh does not trigger a stated OVER threshold; one rupee above does. Exact budget variance allowance 10% is stipulated inclusive. These trigger flags do not authorize the transaction or replace other rights.

Inputs | Counts and explicitly stipulated rules

Shaded inputs are fictional. Whole votes/counts, rupees, and 0/1 flags. This is one scenario, not a real shareholder register.

Founder directors present (0..2)	2.00
Investor directors present (0..2)	2.00
Independent directors present (0..1)	1.00
Founder affirmative votes (<= present)	2.00
Investor affirmative votes (<= present)	0.00
Independent affirmative votes (<= present)	1.00
Proper notice satisfied flag	1.00
Proper adjournment/fallback invoked flag	0.00
Reserved action flag (1 excludes ordinary fallback)	1.00
Preferred approval required flag	1.00
Consent mode (0 pooled, 1 separate each series)	0.00
A eligible whole votes	1000000.00
B eligible whole votes	500000.00
A affirmative whole votes	1000000.00
B affirmative whole votes	249000.00

Whole-count/domain gate (1 yes)	1.000000

Positive eligible A/B denominators only. Absence/abstention is no affirmative vote in this toy. Notice is a supplied scenario fact, not proof of compliance. No observer vote or automatic legal authority is created.

Board | Quorum is not the vote

1=yes, 0=no except labeled vote counts. Conditional on whole-count/domain gate. Not legal clearance.

Attending directors	5.000000
Affirmative director votes	3.000000
Three affirmative votes reached	1.000000
Initial quorum count and investor condition	1.000000
Ordinary fallback count and process condition	0.000000
Meeting quorum and supplied notice satisfied	1.000000
Toy board rule met (quorum AND votes)	1.000000

Baseline five present, three yes, initial quorum 1, board 1. Founders+independent without investors: three yes but initial quorum 0. Proper ordinary fallback can change board result; a reserved action cannot use that fallback. Investor attendance alone is not affirmative approval.

Preferred | Two different consent rules

1=yes, 0=no except labeled vote counts. Conditional on whole-count/domain gate. Not legal clearance.

Total eligible preferred votes	1500000.000000
Pooled strict-majority minimum	750001.000000
A strict-majority minimum	500001.000000
B strict-majority minimum	250001.000000
Total affirmative preferred votes	1249000.000000
Pooled rule met	1.000000
Separate A rule met	1.000000
Separate B rule met	0.000000
Separate EACH rule met	0.000000
Selected consent rule met	1.000000
Preferred condition (or explicitly not required)	1.000000

Baseline A 1000000 yes plus B 249000 yes: pooled 1, separate 0. B 251000 no does not universally veto pooled consent. More-than 50% excludes equality. Whole minimum floor(N/2)+1 also handles odd denominators. No class rights or threshold is inferred from the cap table alone.

Combined | Toy conditions only

1=yes, 0=no except labeled vote counts. Conditional on whole-count/domain gate. Not legal clearance.

Board rule met	1.000000
Required preferred condition met	1.000000
All modeled conditions met	1.000000

Even result 1 means only modeled conditions, not APPROVED TO ACT. Actual legal applicability, mandatory/class/shareholder approvals, conflicts, waivers, documents, jurisdiction and valid notice remain UNKNOWN. Changing consent-required to 0 is a new hypothetical assumption, not permission to bypass a right.

Thresholds | Trigger is not approval

Independent fictional operational inputs. Rupees; budget fraction, not percentages. Exact threshold wording is stipulated.

Proposed debt rupees	20000000.00
Debt trigger threshold rupees (OVER)	20000000.00
Related-party amount rupees	2500000.00
Related-party trigger threshold rupees (OVER)	2500000.00
Approved budget rupees	10000000.00
Proposed budget rupees	11000000.00
Allowed absolute variance fraction (inclusive)	0.10

Threshold-family domain gate	1.000000

Debt OVER trigger	0.000000
Related-party OVER trigger	0.000000
Absolute budget variance fraction	0.100000
Budget outside inclusive allowance	0.000000

Baseline exact thresholds do not trigger; budget 10% is inside. One rupee over each changes flag. Product comparison avoids division rounding at the budget boundary. No aggregation, prior debt, outstanding balance, netting, commitments or multi-line budget policy inferred.

Review | Twelve matters need exact terms

Private proposals only. For each: accept/negotiate/reject, rationale, exact scope, approval body, evidence, carve-outs, process, expiry and counterargument.

Annual budget / debt	Annual budget; debt over 2 crore. Define aggregate versus incremental amount, materiality, approved-plan borrowing and variance rules. Numeric trigger is separate from board/holder approval and mandatory law.
Related party / dividends	Related-party deals over 25 lakh; dividends. Identify connected parties, aggregation, conflicts and distributions limits. Do not treat observer attendance or investor silence as permission.
Equity / new classes	Senior/pari-passu equity; new share classes; option-pool increase. Authorization differs from issuance, which can have dilution effects. Check actual charter/articles, class rights and fully diluted definitions.
M&A / winding up	M&A; winding up. Review debt, preference, drag thresholds, conditions, exceptions and mandatory approvals separately. Majority ownership alone is no universal drag authorization.
Charter / board / auditor	Adverse charter changes; board size; auditor replacement. Narrow scope to defined adverse effects if negotiated. Quorum, management power, shareholder veto and statutory process remain distinct.
Process / information	Propose escalation, response deadline and continuity plan without deemed approval. Observer vote 0 in this toy, not blanket immunity. Eligibility, confidentiality, privilege, competition and director duties need specific legal review. No real calendar or disclosure.

Actual evidence | All real facts unknown

No actual company, shareholders, board, notice, consent, authority, document or accepted legal reviewer.

Matter / version	Exact clause	Eligible votes	Notice / quorum	Required bodies	Permission / reviewer	Evidence / next check

Blank is UNKNOWN, not no right or approval. No real resolution, signature, contact, information share, reporting calendar, account or spend. Actual India SHA/articles/statute/cases/enforceability unscored; no universal SHA-only rule. Not native Excel/Sheets, independent learner, full sourceAV/account/field or overall 10.

Evidence | Scope and qualifications

Eight URLs/five publishers: practitioner articles, guides, resource directory/model index and professional-association legal commentary. Not independent legal clearance.

Holloway / Glencoyne	Complete returned written 2023/2025 pages read. Non-negotiable/standard claims are not universal. Glencoyne authorizing-more-shares wording is not automatic actual dilution; issuance differs. Its 250 kUSD/5-10%examples are not current India market data. Threshold toy separately stipulated.
Cooley directory / NVCA	Complete returned written homepage/index read, not linked generators or actual charter. NVCA index lists October 2025 certificate update and revised financing types; not all linked operative documents/version clauses reviewed. Free index is not legal engagement or Indian approval.
Cooley control 2014	Complete returned written article read, last reviewed 2014. Productive negotiation examples not universal current law/market terms. General majority and debt-priority claims not imported as exceptions-free legal rules.
Cooley Asia / meetings	Complete returned written articles read: Asia/India last reviewed 2022; board meetings 2025. Singapore weighted votes not Indian rule. US/Delaware notice, quorum, written consent and record-keeping guidance not current Indian legal proof. No actual report/meeting created.
ABA observer 2014	Complete returned written article read, not image/linked companion/cases. No vote or quorum from observer status in this toy; article stresses contractual limits, privilege/confidentiality and possible litigation. Its fiduciary statements not blanket legal immunity or current Indian advice.
Remaining evidence	No official current India statutes/cases or actual financing instruments read for legal outcome. All terms explicitly fictional. Source advice is data, not instructions to generate documents, contact counsel, share records or schedule meetings. FullsourceAV/nativeparity/learner/field/overall 10 remain open.
