D124 | Correct facts before comparing terms

PRIVATE FICTIONAL diligence and negotiation case. Crore INR at one valuation date. No real seller, customer, company, investor, transaction, offer, signature, disclosure or spending.

Correct the stale pack	Old ARR10, variable service cost20%, fixed2 gives annual contribution6 and toy value24 at4x. Fictional verified already-effective customer departure lowers ARR to8, contribution4.4/value17.6. Fixed costs mean20% revenue decline is not20% value decline.
Same-date alternatives	BATNA is net incremental surplus1.2 after its own costs/risk convention. Deal surplus = updated toy value minus price minus incremental transaction fees.4. Reservation ceiling16 is not an opening offer, seller acceptance or approved spend.
Price17 versus16	At17 deal surplus.2 trails BATNA by1. At16 surplus1.2 ties, no strict advantage. Stale old valuation would give ceiling22.4. Do not keep asserting the stale revenue/contribution/value after the fictional correction.
Sunk means common history	Diligence.3 already paid/unrecoverable is excluded from both forward choices. A separate reconciled lifetime column subtracts it from both, leaving the same deal-minus-BATNA difference. Do not penalize only the outside option to force a deal.
Availability is required	A known available, same-date/comparable BATNA is stipulated at baseline. Toggle to0 unavailable or blank unknown: arithmetic can illustrate a hypothetical bound but decision comparison holds. Replacement alternative needs fresh evidence, not bluffing.
Scope	Toy4x annual contribution is not DCF, market evidence, fairness opinion or Indian legal advice. Debt/tax/capex/working capital omitted by stipulation, not verified absent in reality. Static prose is Case-v1; learner/reviewer/transfer actuals blank; no overall10.

Inputs | Common valuation date

Synthetic verified versus assumed case facts, crore INR. A valid formula does not establish truth, recipient rights, legal disclosure duties or permission to transact.

Old same-definition annual recurring revenue	10.00
Updated same-definition annual recurring revenue	8.00
Variable service cost fraction of revenue	0.20
Fixed annual cost	2.00
Stipulated toy contribution multiple	4.00
Proposed price, not an offer	17.00
Incremental deal transaction fees	0.40
Comparable BATNA net incremental surplus	1.20
Already paid and unrecoverable diligence	0.30
BATNA available and comparable? 1=yes /0=no	1.00

Economics inputs valid? (1=yes)	1.000000
BATNA availability known? (1=yes)	1.000000

BATNA surplus may be negative in a changed world: it is a net alternative, not gross project value. That does not prove it is the best of all feasible alternatives. Positive multiple stipulated; negative modeled contribution/value remains visible as a toy failure, not silently floored.

Value bridge | Fixed costs matter

Annual contribution and toy capitalized value, crore INR. Not an enterprise-to-equity bridge or market valuation. Same4x shorthand applied to both periods.

Measure	Old stale pack	Corrected case
Annual recurring revenue	10.000000	8.000000
Variable service costs	2.000000	1.600000
Fixed costs	2.000000	2.000000
Annual contribution	6.000000	4.400000
Toy value, NOT fairness opinion	24.000000	17.600000
Revenue decline fraction	0.200000	
Toy value decline, crore INR	6.400000	
Toy value decline fraction	0.266667	

Baseline old6/24 and corrected4.4/17.6. Value decline6.4,26.666667%, despite revenue decline20%. If old revenue/value zero, percentage decline is UNDEFINED, not0. Revised revenue may exceed old in a changed case; negative decline then means growth.

Compare | Net surplus, not price versus gross BATNA

Crore INR at same date. Forward values exclude common sunk cost. A hypothetical numeric bound is not a supported decision if BATNA unavailable/unknown.

Updated toy deal value	17.600000
Proposed deal net incremental surplus	0.200000
Comparable BATNA net incremental surplus	1.200000
Deal surplus minus BATNA surplus	-1.000000
Hypothetical reservation price ceiling	16.000000
Stale OLD-value reservation ceiling	22.400000
Correction reduces reservation ceiling	6.400000
Deal total incl common sunk history	-0.100000
BATNA total incl same sunk history	0.900000
Lifetime difference, same as forward	-1.000000
Known available/comparable BATNA? (1=yes)	1.000000
Conditional numerical comparison	BATNA HIGHER

A negative ceiling says no nonnegative price reaches the stipulated BATNA surplus under this toy model. Never turn the numeric comparison into an offer, signing permission or seller acceptance. If alternative expires, replace and re-evaluate; do not pretend it remains available.

Audit | Arithmetic is not signing clearance

Critical bridge/comparison-reference checks and guarded reservation/surplus outputs. A passing flag does not validate costs, alternative availability, transaction terms, recipient rights or Indian law.

Bridge and comparison identities valid? (1=yes)	1.000000
Guarded hypothetical reservation ceiling	16.000000
Guarded deal minus BATNA difference	-1.000000
Arithmetic and available BATNA ready? (1=yes)	1.000000
Guarded conditional comparison	BATNA HIGHER

This finite identity check does not detect every possible corruption. Unavailable/unknown alternative preserves hypothetical economics but holds comparison. No formula can give real transaction/disclosure authority; it is deliberately not represented as a numeric permission flag.

Facts and audience | Keep classification and scope

Fictional classification and recipient-authority registry. No actual contacts, customer names, signed notices, legal instructions or authorized recipient bindings supplied.

F01 | Verified case fact	Already-effective departure reduces same-definition ARR10 to8 in the fictional facts. Evidence would need signed notice/date/cohort/contract and recognition basis in reality. Do not repeat old pack as current. Real existence/materiality remains unverified.
O01 | Estimate, not fact	4x annual contribution gives17.6 toy value. Stated model estimate, not audited market value, DCF or fairness opinion. Real value needs debt/tax/capex/working-capital/risk/terms evidence. Share only with a separately authorized audience.
P01 | Private preference	Reservation ceiling16 and genuine BATNA net1.2 are private bargaining information under toy assumptions, not customer facts. They need not automatically be disclosed. Privacy is not permission to fabricate another offer or affirm a false factual claim.
R01 | Internal review	Designated diligence/legal owner is a fictional role, not a resolved real recipient. Proposed routing contains only necessary correction/version/calculation questions. No actual email/thread/send, attachments, customer data or audience authorized.
R02 | Seller/bidders/public	No entitlement, NDA, jurisdiction, contract role or legal duty established. Hold external disclosure, factual assertion or signing where unresolved. Do not infer blanket disclosure duty or blanket concealment permission from generic negotiation articles.
Day0 / day7 hold gate	Evidence owner verifies correction and version; cash owner rebuilds comparable surplus; legal owner checks role/contract/recipient scope. Day7 proposed review is not actual appointment or authority. Missing facts or recipient rights hold affected action; actual reviewer and decision blank.

Review draft | Fictional FOR REVIEW ONLY

Unsent classroom example addressed only to fictional diligence/legal roles, not a real person or the user's voice. No email identity, recipient, communication grant or real case is supplied.

Fictional subject	FOR REVIEW ONLY: reconcile corrected ARR and valuation assumptions before any signing or factual assertion.
Fictional body | correction	In this classroom case, the already-effective customer departure changes same-definition annual recurring revenue from10 to8. Please mark the old10/6/24 pack stale and preserve the correction evidence/version. This is a case assumption, not an allegation about a real seller.
Fictional body | model	At stipulated variable cost20%, fixed2 and4x contribution, value is17.6 rather than24. At proposed price17 and incremental fees.4, net deal surplus.2 is below the stipulated comparable BATNA1.2. Conditional ceiling16 is a tie, not an approved offer.
Fictional body | review	Before any real factual assertion, signing or disclosure, the actual owner would need to confirm evidence, current alternative availability, comparable timing/costs and authorized recipients under applicable roles/contracts/law. Generic PON articles do not settle Indian legal duties.
Fictional close | hold	No seller contact, offer, signature, customer attachment or external disclosure is proposed for execution. Keep the correction separate from private reservation preferences; do not fabricate alternatives or assert stale facts as current. Actual review/decision remains unrecorded.

Evidence | Teaching text is not transaction law

Selected Harvard PON written text rechecked13 November2026. Not full negotiation recording, empirical fairness validation, contract review or current Indian legal/accounting opinion.

PON | information categories	https://www.pon.harvard.edu/daily/business-negotiations/how-much-should-you-share/ -29November2022 written discussion distinguishes facts, opinions/predictions and preferences, and costs/benefits of disclosure. No binding India disclosure duty follows.
PON | BATNA/no bluff	https://www.pon.harvard.edu/daily/batna/negotiation-research-you-can-use-should-you-brandish-your-batna-nb/ -17September2026: compare with genuine alternatives; do not fabricate BATNA; private BATNA need not be revealed automatically.
Source correction	Article calls a bad BATNA a WATNA. Not adopted: the best available alternative may be weak but is not the worst alternative. Do not turn its suggested working-on-possibilities wording into an untrue claim when no such possibilities exist.
Limited fresh retrieval	https://www.pon.harvard.edu/daily/batna/negotiation-and-bargaining-with-your-batna-in-mind/ -fresh fetch returned only title/date29October2020, not full article. No fresh empirical experiment/percentage claim validated from that response.
Case and strongest objection	Original D124 synthetic inputs are not sourced from real company records. A cheap-looking price may still be worse than a genuinely available alternative, and arithmetic cannot settle confidential-data entitlement or actual disclosure duties. Hold real actions on missing authority.

Actual work | No real negotiation or learner record

Blank actual evidence, errors, reviewer objections and delayed transfer. Proposed day0/day7 roles are fictional. No real message, offer, data transfer, signed contract or spending.

Actual date/version	Original value bridge	Observed error/source	Rebuilt BATNA/price	Recipient/rights proof	Objection/changed view	Delayed transfer/result

Actual work remains blank. Record only what occurred: dates, reasoning, error/source/correction, strongest objection and a new delayed transfer. No invented learner results, sponsor acceptance, actual budget release or signed rights.

Failure log | Authored execution only

Observed native tests are added only after execution. Not actual learner mistakes, independent human audit, Excel/Sheets parity, real authority or overall 10/10.

Controlled test	Observed authored outcome
Baseline value/surplus/ceiling	PASS:all baseline value/surplus/ceiling formulas independently checked.
Price tie and changed economics	PASS:price16 tie,15 advantage,17 below BATNA;changed costs/revenue.
Sunk cost common-history invariance	PASS:sunk0/10/100 affects both lifetime columns,not relative surplus.
Unavailable/unknown BATNA holds	PASS:BATNA0 unavailable andblankunknown preserve hypothetical economics,hold.
Invalid economics isolation	PASS:15 invalid cases;economics or availability holds isolated.
Broken references/guarded hold	PASS:7 broken references hold guarded summaries.
Zero denominator/negative ceiling	PASS:zero oldrevenue/value percentages UNDEFINED;negative ceiling visible.
Restored baseline/actual blank	PASS:24 changed sets+restore;actual learner/reviewer/transaction fields blank.

Only the original synthetic course exercise at https://top1os.dev/ supplies the case figures. No new empirical reading, real participants, company records, Indian legal clearance, actual commitments or source completeness claimed.
