D 154 | Keep company and fund ledgers apart

PRIVATE FICTIONAL mixed review. Company amounts rupees; three independent fund toys use arbitrary same-scale units, not linked periods. No actual LP letter, call, wire, contact, account or spend.

Four purchase windows	End-age 3 includes initial age 0 plus repeat ages 1, 2, 3. Each monthly repeat buyer places one retained paid order; buyers may overlap across months. No taxes, returns, fixed costs, collection delays or other costs. No claimed lifetime behavior.
Baseline cohort	1000 original buyers; price 800/cost 560/CAC 200. Repeats 250/150/100 at full price. Initial contribution 240000; repeats 120000; total 360000/360 perbuyer; after CAC 160000. Baseline contribution clearsCAC at age 0, not whole-business profit.
Festive cohort	Initial price 480 after 40%discount, cost 560, CAC 250. Repeats 120/80/60 at 800. Initial contribution-80000; repeats 62400; total-17600/-17.6 perbuyer; after CAC-267600. No payback by age 3; later unknown, not proof can never pay back.
Fund toys separate	Commitment 400/prior paid 100/new call 12=>uncalled 288; 10%LPcall 1.2/unfunded 28.8. Independent NAV 150+contribution 10+gain 2-distribution 12=150. Independent snapshotpaid 120/distributed 30/NAV 150=>DPI.25/RVPI 1.25/TVPI 1.5, no datedIRR.
Reporting and sourcing	Draft LP sentence and data-cut request remain unsent. Revenue-only sourcing may reward discounts or acquisition mix; misranking hypothesis needs outcomes, not inevitable model failure. A live dashboard is optional; authorized scoped export may suffice.
Unknowns and transfer	Actual learner errors, private evidence, accepted owner and permission blank. No capital-call terms, notice/default/tax/expense/in-kind legal verdict. Static prose is restored baseline; change inputs, then revise prose before a changed-scenario export.

Company inputs | One matched horizon

All values fictional. Counts whole/nonnegative; repeat count at each month no greater than initial buyers. Prices/costs/CAC rupees.

Measure	Baseline	Festive
Original buyers	1000.00	1000.00
Initial retained price	800.00	480.00
Full-price repeat order price	800.00	800.00
Variable cost per retained order	560.00	560.00
CAC per acquired buyer	200.00	250.00
Age1 repeat buyers / order events	250.00	120.00
Age2 repeat buyers / order events	150.00	80.00
Age3 repeat buyers / order events	100.00	60.00

Numeric gate (1=yes)	1.000000	1.000000

Zero buyers gives undefined per-buyer/rate ratios. Negative computed contribution is retained. The initial festive discount is stipulated; no price elasticity, causal discount effect, real order status or full lifetime is estimated.

Company bridge | Contribution is not revenue

Rupees, one original buyer cohort through end-age 3. No future ages or actual cash-flow dates supplied.

Measure	Baseline	Festive
Initial net sales	800000.000000	480000.000000
Initial contribution	240000.000000	-80000.000000
Repeat order events throughage3	500.000000	260.000000
Full-price repeat net sales	400000.000000	208000.000000
Full-price repeat contribution	120000.000000	62400.000000
Total observed-horizon net sales	1200000.000000	688000.000000
Total observed-horizon contribution	360000.000000	-17600.000000
Acquisition cost	200000.000000	250000.000000
Net contribution after CAC	160000.000000	-267600.000000
Contribution per original buyer	360.000000	-17.600000
Net after CAC per original buyer	160.000000	-267.600000
Repeat events / original buyers	0.500000	0.260000
Initial / full repeat price fraction	1.000000	0.600000

Baseline sales 1200000/contribution 360000/net 160000. Festive sales 688000/contribution-17600/net-267600. Repeat event fraction.50/.26 is not distinct-ever-repeat, subscription survival or SaaSNRR. Initial/full pricefraction 1/.6 does not prove how discounts changed behavior.

Age path | Negative is not missing

Cumulative contribution including initial age 0. Rupees; age 3 is endpoint, not full lifetime. Static payback statements are baseline only.

Window	Baseline	Festive
Through age 0	240000.000000	-80000.000000
Through age 1	300000.000000	-51200.000000
Through age 2	336000.000000	-32000.000000
Through age 3	360000.000000	-17600.000000

Acquisition cost	200000.000000	250000.000000
Age0 contribution coversCAC? (1=yes)	1.000000	0.000000
Age3 contribution coversCAC? (1=yes)	1.000000	0.000000

Baseline 240000/300000/336000/360000; festive-80000/-51200/-32000/-17600. Coverage flags test only listed endpoints, not exact first crossing after arbitrary non-monotone edits. Later behavior unknown, no guaranteed payback. No timing-discounted value or company-wide cashflow.

Fund inputs | Three independent snapshots

Arbitrary same-scale fund units, not rupees customer revenue. No inference that call 12 belongs to NAVcontribution 10 or paid 120 snapshot.

Call toy total commitment	400.00
Call toy prior paid-in	100.00
Call toy new call reducing unfunded	12.00
Call toy LP share fraction	0.10

Independent NAV toy opening NAV	150.00
Independent NAV toy contribution	10.00
Independent NAV toy gain / loss, signed	2.00
Independent NAV toy distribution	12.00

Independent performance toy paid-in	120.00
Independent performance toy distributions	30.00
Independent performance toy NAV	150.00

Call numeric gate	1.000000
NAV numeric gate	1.000000
Performance numeric gate	1.000000

Signed gains/losses and resulting negative unfunded/NAV are retained as investigation exceptions, not silently floored. All classifications stipulated, no recallable/fee/carry/FX/other adjustment assumed. Real agreement and complete ledger still needed.

Fund outputs | Do not combine the toys

Separate scales/periods from company cohort. Arithmetic only, not a current LP statement or authorized notice/payment.

Call toy opening unfunded	300.000000
Call toy ending unfunded	288.000000
Call toy LP current call	1.200000
Call toy LP ending unfunded	28.800000

Independent NAV toy ending NAV	150.000000

Performance toy DPI	0.250000
Performance toy RVPI	1.250000
Performance toy TVPI	1.500000
DPI + RVPI - TVPI identity	0.000000

Call 300->288; LP 1.2/28.8. Separate NAV 150+10+2-12=150, not 162. Snapshot.25/1.25/1.5; identity 0, not IRR. Zero paid-in ratios undefined. Negative unfunded signals inconsistency with unstated limits; not automatic authority to call more or evidence of default.

Draft review | A sentence is not a sent report

One-page private draft. No real LP recipients, audience, company, fund commitment, capital call, reference contact or advisory opinion.

Draft LP summary	In the fictional company case, festive initial discount cohorts have negative observed age 3 contribution after CAC; later full-price behavior remains unverified. Revenue, gross order definitions, company costs and fund NAV belong to separate scopes. No matching fund write-down amount follows from cohort losses.
Draft data-cut request	If later authorized, request matched-age full-price repeats/contribution with cohort identity, start/event/clock/cutoff, discount/refund/status/channel definitions, eligible denominators, cost completeness and permitted audience. A scoped export may suffice; no live dashboard entitlement or private GST/account retrieval.
Sourcing hypothesis	A revenue-only screen may rank paid acquisition or discounted mix favorably. Test coverage, timing, missed candidates, labels, outcomes and costs. A score is ranking, not calibrated investment probability or inevitable model failure. Ensemble claims coverage and precision; not independently validated here.
Contract and law scope	Actual call notice/default/expense allocation/in-kind distribution requires governing documents, valid facts, applicable law, tax, valuation, liquidity/custody and recipient constraints. ILPA template is supplemental guidance, not automatic law/permission. No blanket IFSC tax neutrality or historical proposal clearance.
Transfer without notes	Change festive CAC to 300 while leaving price/orders: age 3 contribution remains-17600, net becomes-317600. Separately change repeat price 700: repeatcontribution 36400, total-43600/net-293600 at original CAC 250. Company edit must not change any independent fund result.
Learner evidence	Overall day score/confidence does not identify a measured weakest skill. Record actual item/answer/reason/error only if observed; otherwise offer provisional practice. Reference nonanswer is only nonanswer, not founder verdict or consent to off-list contacts. Actual response and accepted owner blank.

Actual plan | No real reporting or execution

Blank observations are unknown, not zero, pass, accepted accountability or permission. No actual LP/customer/data/contact/account action.

Scope / unit	Definition / date	Artifact / access	Observed error	Contradiction	Accepted owner	Authority / next

No real LP report, notice, call, wire, reference, data-cut request, dashboard invitation, private upload, contract cure, account, tax clearance or spending. A draft output does not authorize sending it. Numeric headroom does not establish contractual permission.

Evidence | Reuse methods, not historical facts

Seven URLs/five organizations/three types: association reporting guidance, vendor/practitioner methods, accounting textbook. Selected written scope only.

Cohort framework reused	https://www.goingvc.com/post/a-guide-to-conducting-a-cohort-analysis-as-a-vc | Complete returned May 15, 2025 written read in D 153, reused without unchanged refetch. VC framework adapted to explicit fictional company, no causal/model-outcome proof. https://amplitude.com/docs/analytics/charts/retention-analysis/retention-analysis-calculation | Complete returned written read D 153, reused: exact-age differs from on-or-after tail; eligibility matters. Opening by-point language not within-by X formula.
Investor/terms reused	https://amplitude.com/blog/startup-fundraising-metrics | Complete returned February 21, 2023 written read D 153, reused, not images/citedoutcomes/currenttiers. Stage/model-dependent opinions, not universal PMF threshold/dashboard entitlement. https://openstax.org/books/principles-managerial-accounting/pages/3-key-terms | Complete returned key terms read D 153, reused, not whole chapter/statutory recognition.
Original ILPA source	https://ilpa.org/wp-content/uploads/2016/09/ILPA-Best-Practices-Quarterly-Reporting-Standards_Version-1.1.pdf | Selected written opening/disclaimer/summary letter/PCAP/commitment/NAV/metrics/sample-label passages read, not full PDF/pages visually checked. September 2016 v 1.1, historical guidance, not current mandatory format, law or actualcontract. Scrambled extracted sample amounts not adopted.
Updated guidance	https://ilpa.org/wp-content/uploads/2025/01/ILPA-Reporting-Template-v.-2.0-Suggested-Guidance.pdf | Selected written opening/key changes/structural continuity/NAV roll/conformity/implementation passages read, not whole PDF/external templates. January 2025 guidance targets go-forwardQ 1, 2026 adoptionfor specified funds; not universal legal deadline/current fund compliance verdict. Supplemental, consistent with LPA/accounting; does not prescribe which expenses covered by fee.
Sourcing practitioner	https://www.ensemble.vc/research/unity-data-driven-sourcing | Complete returned January 3, 2025 written read, not platform image/underlying data/outcomes. World-leading/never miss/coverage/precision claims are vendor assertions, not validated accuracy or causal return evidence. No data feed/account/access or contact.
Limits	All company/fund figures fictional and independent. No customer identities, real LP accounts, source grant, law/tax/expense/in-kind/default clearance, causal validation, full source AV, native Excel/Sheets parity, independent learner/account/field/actualoverall 10. Original objectives/exercise/all 25 quiz retained. Actual evidence/authority/accepted owner blank.

Failure log | Authored checks, not learner outcomes

Independent expected arithmetic and controlled change/failure tests only. No LP acceptance, investment outcome, actual learner or legal validation.

1	PASS: 54 baseline formulas independently recomputed.
2	PASS: 20 changed input sets plus restored baseline.
3	PASS: 20 invalid inputs/1080 isolation checks.
4	PASS: 6 broken references/6 checks.
5	PASS: 8 boundaries;zero denominators undefined.
6	PASS: negative contribution/NAV/unfunded retained.
7	PASS: company/fund and independent fund families isolated.
8	PASS: actual evidence/consent/accepted-owner rows blank.
