D 137 | Reconcile numbers, do not invent blame

PRIVATE FICTIONAL governance practice. No real company allegation, investigation, legal opinion, actual message, access request, disclosure or regulator contact.

Cash difference	Three non-overlapping entities at the same reporting date have independently confirmed cash 7, 5, 4 crore. Total 16; draft 20 differs by 4. This is an unreconciled difference, not proof of theft, fraud, director knowledge or a missing transaction.
Internal balance once	Receivables 12+8 include an internal 3 counted once in those amounts. External total 17, not 14 or 20. The assumed group/perimeter and date are stipulated, not established for an actual entity. Eliminating receivables here does not also reduce the independent cash sum.
Dates are not knowledge	Relationship disclosed day 1, committee receipt day 3, board approvalday 5. Gaps 2, 2, 4 days are record intervals, not statutory delays or proof of who knew what. Missing minutes and an influence allegation remain separate; sequence does not prove influence.
Controls, not guarantees	Design conflict assessment, recusal/disinterested review, independent confirmation and documented escalation. OECD board delegation generally leaves board responsibility unless legally defined otherwise. COSO internal control offers reasonable, not absolute assurance.
Do not substitute roles	Management owns decisions/risk; internal audit supplies independent assurance/advice; external audit has a defined assurance scope; board oversees. A credit rating is a credit-risk opinion, not a cash confirmation, governance certification or repayment guarantee.
Attempt without sending	Use blank evidence rows and an unsent four-sentence fictional refusal: issue, accurate alternative, evidence needed, escalation boundary. No actual individual, company or recipient needed. A toy green checklist is not a true assurance opinion or real permission.

Inputs | Fictional reporting and control facts

Yellow synthetic controls. Same date/perimeter and non-overlap are stipulated switches, not independently verified actual facts. Numeric cash amounts nonnegative; days whole and positive.

Entity 1 independently confirmed cash, crore	7.00
Entity 2 independently confirmed cash, crore	5.00
Entity 3 independently confirmed cash, crore	4.00
Draft reported cash, crore	20.00
Same date/perimeter and no cash overlap?0/1	1.00

Entity 1 receivables, crore	12.00
Entity 2 receivables, crore	8.00
Internal receivable counted ONCE, crore	3.00
Same group/date and internal amount verified?0/1	1.00

Relationship disclosure, day	1.00
Committee receipt, day	3.00
Board approval record, day	5.00

Inputs | Fictional reporting and control facts

Yellow synthetic controls. Same date/perimeter and non-overlap are stipulated switches, not independently verified actual facts. Numeric cash amounts nonnegative; days whole and positive.

Toy: required conflict disclosure evidenced?0/1	1.00
Toy: disinterested review/recusal evidenced?0/1	1.00
Toy: required minutes/source record available?0/1	0.00
Toy: independent balance check evidenced?0/1	1.00
Toy: escalation owner/boundary clear?0/1	1.00
Toy: confidential access/protection defined?0/1	1.00

Cash numeric/flag controls valid?	1.000000
Receivable numeric/flag controls valid?	1.000000
Timeline controls valid?	1.000000
Toy control switches valid?	1.000000

A 0 basis flag means the relevant sum cannot be treated as a comparable verified total and is left undefined. Disordered days remain computable and are flagged; the model never silently sorts records. No arbitrary materiality/legal threshold or fraud probability.

Cash | Difference, not a fraud finding

Crore. Signed difference=draft minus independently confirmed comparable total. Positive means draft is above that total; negative means below; zero only arithmetic agreement.

Confirmed comparable cash total	16.000000
Draft less confirmed total	4.000000
Absolute unreconciled difference	4.000000
Draft difference: fraction of confirmed total	0.250000
Arithmetic equality only: 1 yes/0 no	0.000000

Baseline 16, 4, 4, 0.25 and 0. A 25% relative difference is not a fraud probability or legal materiality finding. Zero confirmed total makes relative difference undefined. Missing confirmations, date/perimeter, restrictions, ownership and ledger adjustments must be checked in a real audit; no invented balancing plug.

Receivables | Eliminate the internal item once

Crore. The internal 3 is included once in 12+8. This is a toy external-receivable reconciliation, not a complete consolidation of every asset/liability or framework applicability conclusion.

Gross entity receivables	20.000000
Internal elimination counted ONCE	3.000000
External receivables	17.000000
Diagnostic wrong double-elimination result	14.000000
Double-elimination understatement	3.000000

Baseline 20 gross-3 internal=17 external. Wrong double elimination gives 14 and understates by 3. The 14 is deliberately labeled wrong, not an alternative acceptable total. Internal 0 restores gross. IFRS 10 B 86(c) supports elimination within its scope, not an asserted current Indian statutory requirement for this fictional case.

Timeline | Recorded intervals, not inferred knowledge

Days numbered within a fictional case. Sequence is tested without changing the source dates. No legal deadline, minutes content, knowledge state or causal influence inferred.

Disclosure to committee receipt: days	2.000000
Committee receipt to approval: days	2.000000
Disclosure to approval: days	4.000000
Chronological nondecreasing records?1/0	1.000000

Baseline 2, 2, 4 days and chronology 1. Tied days allowed; negative interval flags reversal to investigate, not fraud. A memo alleging influence is evidence an allegation exists, not corroborated minutes. Obtain dated original records and responses before any real-company verdict; do not automatically contact anyone.

Controls | Missing minutes stays a gap

Numeric 1/0 toy design checks, not operating-effectiveness assurance, lawful access, permission to send or actual verified evidence. Do not turn a concern into a proven allegation.

Conflict disclosure evidence present?	1.000000
Disinterested review/recusal evidence present?	1.000000
Minutes/source record available?	0.000000
Independent balance check evidence present?	1.000000
Escalation owner/boundary defined?	1.000000
Confidentiality/protection defined?	1.000000
ALL listed toy evidence conditions pass?	0.000000

Baseline minutes 0 gives overall 0 even though other flags 1. Changing minutes to 1 only passes listed toy switches, not a full review or actual authority. Related-party status is a review trigger, not proof of abuse; documentation/recusal cannot guarantee fair terms. Protect identities and controlled evidence access.

Register | Record, allegation, inference, gap

A model answer to classification, not a filled actual investigation. Records are stipulated only in the fictional case.

Record | balances	Fictional independent confirmations 7, 5, 4 at same date/perimeter; draft 20. Calculation 16/4. Next evidence: underlying confirmations, account ownership/restrictions, ledger and consolidation reconciliation. No invented missing 4 transaction.
Record | dates	Disclosure day 1; committee receipt day 3; approval record day 5. Calculation 2/2/4. Receipt by a committee does not prove every director received, read or understood the disclosure.
Allegation | memo	Internal memo alleges influence, no supplied minutes. Keep author/source/date/authenticity and allegation status separate from substantive truth. A plausible narrative or repeated copies are not independent corroboration.
Gap | decision record	Missing minutes, attendance/recusal, terms, independent review and reasons remain unresolved. Seek authorized access through the proper owner; this lab does not authorize a request or disclosure.
Control chain	Management prepares/reconciles; independent checks challenge; internal audit evaluates; committee/board oversee and escalate. External audit is scoped assurance, not management or all-purpose governance certification. Credit ratings cannot replace confirmations.
Unsent refusal prompt	Write four fictional sentences yourself: state the mismatch, offer the accurate total with qualification, name the missing evidence, and state the escalation/stop boundary. Keep unsent; do not accuse a real person or publish private records.

Actual work | Blank evidence and unsent practice

PRIVATE learner/reviewer work. Four rows for record/allegation/inference/gap. Do not enter sensitive whistleblower/customer/director information.

Record / claim	Source / date	Status	What follows	Still unknown	Next evidence	Owner / boundary

Unsent sentence 1: issue
Unsent sentence 2: accurate alternative
Unsent sentence 3: evidence needed
Unsent sentence 4: escalation boundary

Reviewer/transfer evidence remains blank until actual work exists. Change one balance/date/control family, recompute, explain and restore. Keep original exercise and quiz intact. No real-company finding, current Indian-law verdict or actual message authorized.

Evidence | Source depth and jurisdiction

Six source organizations/types of guidance, not six independent tests of this lab. No full audiovisual, native cross-viewer, independent learner/account/legal or overall 10 claim.

OECD 2023 chapter	https://www.oecd.org/en/publications/g20-oecd-principles-of-corporate-governance-2023_ed750b30-en/full-report/component-8.html | Complete returned board chapter/annotations read. Independence, conflicts, whistleblowing, reporting, oversight and delegation qualification. Good practice across jurisdictions, not binding Indian law.
IIA model	https://www.theiia.org/globalassets/documents/about-us/about-internal-audit/three-lines-model-updated.pdf | Selected principles 1-6, core roles and independence/interaction passages only, not full PDF/diagram. Roles concurrent, not numbered chronological steps; internal audit not management.
PCAOB evidence	https://pcaobus.org/oversight/standards/auditing-standards/details/AS1105 | Selected .01-.10 A and.29, not whole standard/appendices. Relevant/reliable evidence, contradictions resolved, more poor evidence cannot fix poor quality. US auditing context, not Indian applicability.
SEC investor bulletin	https://www.investor.gov/introduction-investing/general-resources/news-alerts/alerts-bulletins/investor-bulletins/updated-8 | Selected opening, rating definition/limitations, not whole bulletin. Credit opinion, not investment advice or guarantee; AAA can default. No company-specific rating verified.
IFRS 10 and COSO	https://www.ifrs.org/content/dam/ifrs/publications/html-standards/english/2026/issued/ifrs10.html | Selected B 86 consolidation passage from full HTML, not whole standard. https://www.coso.org/%5Ffiles/ugd/3059fc%5F1df7d5dd38074006bce8fdf621a942cf.pdf | Selected 2013 executive-summary definition/effectiveness/limitations, not full PDF. Reasonable, not absolute assurance.
Scope and limits	Framework applicability, current Indian laws/materiality/legal duties and specific real cases not determined. No findings on Jet Airways, Yes Bank, IL&FS, Satyam, HDFC or any director. No actual email/access/disclosure/allegation/regulator contact, account, budget or spend. Sources support design, not independent validation of learner transfer.

Failure log | Authored checks, not assurance

Recompute changed/invalid controls, challenge broken result references and restore. No actual learner or production evidence.

1	PASS: 25 baseline formulas independently recomputed.
2	PASS: 24 changed sets plus clean restore.
3	PASS: 16 invalid controls/400 isolation checks.
4	PASS: 6 broken references/6 explicit error checks.
5	PASS: zero total relative difference undefined.
6	PASS: basis 0 undefined; date reversal flagged, not sorted.
7	PASS: minutes gap 0 prevents all-listed pass.
8	PASS: actual learner and unsent refusal cells blank.
