D125 | Boundaries before boxes

PRIVATE FICTIONAL portfolio, not Titan investment advice. Own and rival revenues share one date, geography, unit and nonoverlapping market definition. No actual capital allocation, outreach or spending.

Attempt first	Rebuild market growth, own growth, own and largest-other-rival shares, relative share and quadrant. A high-growth business does not prove a high-growth market. Market boundaries are stipulated, not independently validated.
Explicit convention	High market growth >=10%; high relative share >=1, including ties. Largest OTHER rival is denominator even for a leader. These classroom thresholds are not universal; BCG2014 study uses third-ranked competitor and relative growth instead.
Baseline map	A star: market90->100, own25->30, rival20. B pet:190->200, own20,rival40. C cash cow:100->100,own15,rival10. D question mark:50->60,own10,rival20. Prior B/C/D own revenues are not supplied, so own growth remains UNDEFINED.
Scope and overlap	Fictional total200 already includes subsidiary40: adding gives240 and double counts40; compatible disjoint carve-out160+40=200. Requires identical accounting scope; not permission to subtract incompatible Titan figures.
Portfolio economics	Loss2 enables benefit6: keep-pair contribution4; closing with no substitute changes portfolio by-4. Available substitute cost1 preserving all6 gives close+substitute change+1 versus current. Partial retention, cost and availability must be tested.
Judgment is not a fact	Subjective GE attractiveness4/2/3 weighted.5/.3/.2 gives3.2 on1-5 scale. Higher risk-resilience score is better. No competitive-strength axis supplied, so no complete nine-box placement. Actual work blank; not overall10/10.

Inputs | Fictional same-market ledger

Crore revenue; one common year and geography. B/C/D prior own revenue deliberately blank because not supplied. Enter facts only with compatible scope. Formula validity cannot prove boundaries.

Unit	Own current	Own prior	Largest other	Market current	Market prior
A	30.00	25.00	20.00	100.00	90.00
B	20.00		40.00	200.00	190.00
C	15.00		10.00	100.00	100.00
D	10.00		20.00	60.00	50.00

Growth cutoff	0.10
Share cutoff	1.00

Current own plus largest-other rival cannot exceed same-market total. Prior market and current rival must be positive; no market decline floor. Zero prior own means own growth UNDEFINED, not0. Lowering share cutoff to0 is allowed as an explicit sensitivity convention, not a factual discovery.

Growth share | Calculate before classifying

Growth fractions shown as decimals; 0.111111 means11.111111%. Own growth not substituted for market growth. Each unit uses its OWN market denominator, not total portfolio revenue.

Unit	Valid?	Market growth	Own growth	Own share	Rival share	Relative share
A	1.000000	0.111111	0.200000	0.300000	0.200000	1.500000
B	1.000000	0.052632	UNDEFINED	0.100000	0.200000	0.500000
C	1.000000	0.000000	UNDEFINED	0.150000	0.100000	1.500000
D	1.000000	0.200000	UNDEFINED	0.166667	0.333333	0.500000

Cutoffs valid?	1.000000

A	STAR
B	PET
C	CASH COW
D	QUESTION MARK

Classification is a hypothesis, not an instruction to sell or invest. Share is not a guaranteed source of sustained returns. Fictional inputs have no market-source provenance. Missing/invalid row holds that row; missing/invalid cutoff holds all classifications.

Overlap | Included is not additive

Fictional crore revenue on one aligned basis. A carve-out is valid only under stated inclusion, no intercompany/definition differences. Not a real Titan consolidation reconciliation.

Consolidated total already including subsidiary	200.00
Included subsidiary on SAME basis	40.00

Compatible numeric inclusion? (1=yes)	1.000000

Wrong total plus included subsidiary	240.000000
Double-counted amount	40.000000
Compatible residual excluding subsidiary	160.000000
Disjoint residual plus subsidiary	200.000000
Residual reconciliation gap	0.000000

Baseline wrong240,overcount40,residual160,reconciled200,gap0. In real accounts, scope alignment must be established separately; numeric subtraction cannot remove intercompany or definition differences that were never supplied.

Externality | A label is not portfolio economics

Lakh present value at one common date, relative to current keep-pair arrangement. No other transition, tax, quality or execution costs stipulated. Missing availability holds the substitute comparison.

Pet standalone loss, positive magnitude	2.00
Incremental star benefit enabled by pet	6.00
Substitute cost	1.00
Fraction of benefit preserved by substitute	1.00
Substitute available? 1=yes /0=no	1.00

Economics valid?	1.000000

Keep-pair contribution versus no effects	4.000000
Close, no substitute: change versus current	-4.000000
Close+substitute: conditional change	1.000000

Substitute comparison available?	1.000000
Conditional result, not authority	IMPROVES

At full retention and cost1,closing+substitute improves1;at0 retention it changes-5. Cost2/full retention ties. Substitute availability0 or blank holds result,not hypothetical arithmetic. Do not blindly retain or sell all pets.

GE judgment | Subjective one-axis sensitivity

Not a measured attractiveness fact, not a full nine-box placement. Scores1-5, higher better including risk-resilience. Weights must sum1, not silently normalized.

Criterion	Score 1-5	Weight
Growth	4.00	0.50
Margin	2.00	0.30
Risk-resilience (higher is better)	3.00	0.20

Scores/weights valid?	1.000000
Subjective weighted attractiveness	3.200000

Baseline3.2. Weights.3/.5/.2 yield2.8. Different judgments can alter placement; specify cutoffs and competitive strength separately before a complete3x3 map. Arithmetic consistency does not validate scores or choose a real investment.

Real evidence | Titan positions remain UNRESOLVED

Dated Q4FY26 company release, not latest-quarter claim or independent market study. No real portfolio quadrant or investment decision supplied.

Observed inconsistency	Fresh website still says jewellery18,195crore in headline and8,195 in body. Do not silently repair as a clean observation. Need legible dated filing/financial notes before using amount; press release not full accounts.
Included subsidiary	India jewellery includes CaratLane. Do not add the included amount again as a standalone additive portfolio unit. Rounded parts16,047+1,066=17,113 versus17,114 total:flag1crore rounding difference,not hidden business.
Different scope	Bullion/digital gold excluded;Damas consolidated fromQ4FY26. Geography and acquisition matter. Watch analog growth15% differs from division total-income growth8%;neither is external market growth. Fragrance inside combined emerging businesses,not isolated segment evidence.
Missing denominators	Same-market independent industry growth and largest-other-rival revenue/share not established. All real Titan quadrant placements remain UNRESOLVED. Brand fame,own growth and profit do not fill those gaps.
Actual hold	Record source date,market boundary,units,scope,denominator and discrepancy resolution. Actual reviewer/decision blank. Fictional arithmetic cannot authorize real allocation,divestiture,offer,contact,disclosure or spend.

Evidence | Selected written context, not full media

Selected written pages rechecked13 November2026. Not full videos, diagrams, source study replication, full financial statements or current market denominators.

BCG overview	https://www.bcg.com/about/overview/our-history/growth-share-matrix - four-quadrant classical framework. Strong original pets-are-worthless claim is not treated as universal;fictional externality/substitute sensitivity is course-authored.
BCG2014 convention	https://www.bcg.com/publications/2014/growth-share-matrix-bcg-classics-revisited - historical1980-2012 analysis uses third-ranked-company share and growth relative to market. Distinct from classroom largest-other-rival and absolute market-growth10% convention. Not current empirical replication.
McKinsey written introduction	https://www.mckinsey.com/capabilities/strategy-and-corporate-finance/our-insights/enduring-ideas-the-ge-and-mckinsey-nine-box-matrix -1September2008:industry attractiveness and competitive strength;judgment/trade-offs. Written introduction only,not interactive presentation.
Titan dated source	https://www.titancompany.in/news/titan-FY26-results - website discrepancy and consolidation scope observed. Dated Q4FY26 release,not latest-quarter verification. Filing legibility and independent market denominators remain open.

Actual work | Learner and portfolio decisions blank

No empirical learner, analyst, reviewer, portfolio allocation or delayed-transfer result invented. Proposed day0/day7 roles fictional.

Actual date/source	Boundary/denominator	Original map	Observed error	Rebuilt sensitivity	Objection/change	Delayed transfer

Actual work remains blank. Record only what occurred: dates, reasoning, error/source/correction, strongest objection and a new delayed transfer. No invented learner results, sponsor acceptance, actual budget release or signed rights.

Failure log | Authored execution only

Observed native tests are added only after execution. Not actual learner mistakes, independent human audit, Excel/Sheets parity, real authority or overall 10/10.

Controlled test	Observed authored outcome
Baseline ratios/quadrants	PASS:every saved formula independently checked at baseline.
Cutoff tie and sensitivity	PASS:market/own growth,largest other rival,cutoff ties/sensitivity.
Row-isolated invalid inputs	PASS:row isolation;invalid cutoffs hold all quadrants.
Overlap and inclusion	PASS:included subsidiary not additive;zero/equal inclusion tested.
Externality/substitute/hold	PASS:substitute cost/retention/availability and sunk-free comparison.
GE weights and score validity	PASS:score and weights validity;changed subjective score.
Broken calculation references	PASS:broken growth/share/substitute outputs hold classifications.
Restored baseline/actual blank	PASS:24 changed sets+restore;actual records blank.

Only the original synthetic course exercise at https://top1os.dev/ supplies the case figures. No new empirical reading, real participants, company records, Indian legal clearance, actual commitments or source completeness claimed.
