D 159 | Compare packages, not just headline price

FICTIONAL offline term-sheet roleplay. No actual deal, term sheet, investor agreement, contact, signature, generator, account or spend.

Round and issued common	80 crore new money / 320 pre / 400 post gives investor 20%. Employee allocation 20% POST created within pre-money gives founder 60%, employee 20%, investor 20%. Employees already hold issued vested common in this payout toy, not an unallocated option reserve.
Targets differ	20% post employee allocation requires 25% of pre-financing capitalization. Separate 10% post allocation, investor 20%, leaves founder 70%. No existing pool/other holders/options/notes/debt/fees/taxes. Do not distribute exit cash to nonexistent unallocated shares.
Exit comparisons	At 400: participating founder 192/employee 64/investor 144; non-participating 240/80/80. At 1500: 852/284/364 versus 900/300/300. Removing participation increases founder 48 at BOTH endpoints, not a universal ranking across terms or exits.
Smaller allocation package	10% post employee allocation plus non-participating investor 20% yields founder 280 at 400 and 1050 at 1500. Pool-only gains versus same non-participating 20% allocation are 40/150. Combined changes interact; do not add overlapping package gains twice.
Separate anti-dilution toy	Old conversion/issue price 10, preferred 1000 originally 1: 1, broad-base pre-issue A 10000, new cash 20000 at 5. B 2000/C 4000, weighted CP 60/7, ratio 7/6, as-converted 1166.666667; full ratchet CP 5, ratio 2, shares 2000. Not another round inside the exit model.
Non-price terms unknown	No unique rupee cost for 2 of 5 board seats, 3 year re-vesting, 45 day no-shop or milestone tranches. Need process/rights, vesting credit/leaver terms, binding scope, alternatives, milestones, verification, cure, funding obligations and runway. Final proposal is SIMULATED, not consent or agreement.

Exit inputs | One new investor, two allocations

Crore and fractions. Employee allocation is already issued vested common solely for this payout illustration.

New investor amount crore	80.00
Pre-money including employee allocation crore	320.00
Employee common fraction POST (base package)	0.20
Employee common fraction POST (smaller package)	0.10
Distributable equity exit crore	400.00

Exit family domain gate (1 yes)	1.000000

Strictly positive founder remainder in both packages required. All old founder shares; no other preferred, existing pool, unexercised options, convertibles, secondary or liabilities. E is equity distributable cash, not enterprise value. One uncapped 1 x participating investor or 1 x non-participating alternative.

Ownership | Post-round target, pre-round creation

Conditional fictional arithmetic only. Crore except labeled fractions, prices, ratios or shares.

Post-money crore	400.000000
Investor post fraction	0.200000
Base employee post fraction	0.200000
Base founder post fraction	0.600000
Base employee fraction of PRE financing capitalization	0.250000
Base fractions sum	1.000000
Smaller employee post fraction	0.100000
Smaller founder post fraction	0.700000
Smaller employee fraction of PRE financing capitalization	0.125000
Smaller fractions sum	1.000000

Baseline 400, .2, .2, .6, .25, 1, .1, .7, .125, 1. A 20%PRE allocation followed by 20%new money would end 16%POST, not 20%. Same target POST created after round and borne pro rata would dilute investor too; that is a different package.

Exit comparison | Cash limited by available proceeds

Conditional fictional arithmetic only. Crore except labeled fractions, prices, ratios or shares.

E distributable equity cash	400.000000
Participating investor preference actually payable	80.000000
Participating residual after preference	320.000000
Participating investor total	144.000000
Participating founder total	192.000000
Participating employee total	64.000000
Participating payout sum	400.000000
Non-participating investor total	80.000000
Non-participating founder total	240.000000
Non-participating employee total	80.000000
Non-participating payout sum	400.000000
Founder gain removing participation, same allocation	48.000000
Smaller-allocation non-participating founder	280.000000
Smaller-allocation non-participating employee	40.000000
Smaller package payout sum	400.000000
Pool-only founder gain at non-participating terms	40.000000
Total package founder gain vs base participating	88.000000
Interaction-safe gains reconciliation	0.000000

At 400 founder 192/240/280; at 1500 founder 852/900/1050. Founder participation-removal gain 48 at both, combined gains 88/198. At exits below 80 investor can only take available cash, not guaranteed 80. Ratchet/vesting/board/no-shop/tranche effects excluded, not assigned zero actual cost.

AD inputs | Separate anti-dilution case

Units: rupees/share, rupees and as-converted shares. Not a hidden financing round inside the exit calculation.

Old conversion AND original issue price rupees/share	10.00
Protected preferred shares (originally1:1)	1000.00
Broad-base PRE-issue as-converted shares A	10000.00
New cash consideration rupees	20000.00
New round price rupees/share	5.00

Separate anti-dilution domain gate	1.000000

New price must be<=old price. Up-round regime outside this calculator, not a negative anti-dilution adjustment. A is supplied contractual broad base, not invented from proceeds. Protected shares originally 1: 1; no prior adjustment. Fractional as-converted shares retained; actual rounding/definitions/exclusions unknown.

Anti dilution | Conversion shares, not fixed ownership

Conditional fictional arithmetic only. Crore except labeled fractions, prices, ratios or shares.

B equivalent new shares at OLD price	2000.000000
C actual new shares at NEW price	4000.000000
Weighted average new conversion price	8.571429
Weighted conversion ratio	1.166667
Weighted as-converted protected shares	1166.666667
Weighted incremental conversion shares	166.666667
Full-ratchet conversion price	5.000000
Full-ratchet conversion ratio	2.000000
Full-ratchet as-converted protected shares	2000.000000
Full-ratchet incremental conversion shares	1000.000000
Difference ratchet minus weighted conversion shares	833.333333

BaselineB 2000/C 4000; CP 8.571429; ratio 1.166667; shares 1166.666667 vs 2000. Mechanisms change conversion entitlement, not automatically issue extra stock now or guarantee original ownership. At equal price both ratios 1, not a strictly larger ratchet adjustment. Actual fully diluted post-round denominator/ownership not solved.

Roleplay | Rank conditionally, keep unresolved points

Private simulated founder/investor exchange only. No words sent, real agreement, legal redline or execution.

Five changes	Select five priorities conditional on runway, hiring, exit scenarios, probabilities, alternative financing and legal/regulatory risk. Record founder counter, investor counter and SIMULATED final proposal. Economics calculator is evidence, not an automatic ranking or real consent.
Pool and preference	Specify post-round target, pre/post creation, existing pool top-up, issued common versus options, exercise treatment and hiring plan. Compare complete packages at identical exit assumptions. Do not sum overlapping counterfactuals or invent proceeds for an unallocated pool.
Ratchet and exceptions	Review original issue/conversion price, capitalization definition, qualifying issuance, employee/acquisition/note exclusions, rounding and outstanding instruments. Weighted-average label alone does not define all parameters. No automatic fixed ownership protection.
Board and re-vesting	Two investor seats out of five are not a majority alone; quorum/consent/independent selection matter. Re-vesting needs prior service credit, cliff, start date, good/bad leaver, repurchase and acceleration. No unique rupee result from 3 years alone.
No-shop and tranches	45 days alone is not a cash cost or optimal duration. Check binding scope, confidentiality/expert carve-outs, exclusivity expiry, termination, fees and alternatives. Tranches need milestones, objective verification, cure, funding obligation, outside date and runway timing. No invented promise to fund.
Legal and relationship risk	Material personal liability/regulatory tail risks cannot be discarded as edge clauses. A second investor can improve alternatives, not guarantee price, tone or leverage. Binding effect is document/jurisdiction-specific. No universal nonbinding or SHA rule; qualified review remains unresolved.

Actual evidence | No real financing or consent

All actual company, investor, documents, alternatives, permissions, reviewer and acceptance remain unknown.

Clause / version	Actual source	Founder counter	Investor response	Missing assumptions	Permission / reviewer	Simulated / accepted

Blank unknowns never become zero risk or agreement. No actual financing, term sheet, signature, contact, legal engagement, document generator, account, calendar or spend. No native Excel/Sheets, independent learner, full source/AV, field/current Indian law/overall 10.

Evidence | Explicit math, qualified sources

Seven URLs/six publishers/three types: founder anecdote, practitioner legal guides, vendor help/product/accounting guidance. Not independent evidence of ideal terms.

Xaver Apr 30, 2026	Complete returned article/comments read, not image/webinar/call or anecdote verification. Its text says valuation fifth but prose says sixth; no universal ranking adopted.20%new money and 15%POST pool implies 65% founder, not 68%. 68% fits 15% PRE => 12% POST. Automatic later-round seniority not universal.
SeedLegals US guide	Complete returned written page/table read; published Nov 2024 / updated Aug 2023 metadata conflict retained. Blanket nonbinding/no-shop/confidentiality and market statements qualified to actual documents/jurisdiction. Nonparticipating conversion means fraction of total distributable cash, not fraction after another preference payout.
DLA / Holloway	Complete returned written formulas/definitions read, not linked PDF/cases/image-formula pixels. DLA charter terms may vary; A supplied explicitly. Ratchet strictly larger not at equal-price/no-adjustment boundary. Holloway ownership-protection wording does not guarantee fixed percentage.
SeedLegals pool help	Complete written UK help page read, not product UI/images/execution. Reserved pool not issued shares until exercise distinction used. UK EMI/75%/Companies House/board documentation claims not current Indian law; no generator, resolution, filing or account action.
Beancount guide	Complete returned written guide/examples read. Numeric examples compared, not asserted verified market data. Its normative rankings, board defaults, redline suggestions and walk-away rules not universal. No ledger/account/API/MCP setup or imported persistent instructions.
Cooley directory reused	D 158 complete written homepage evidence reused, not newly read generators/operative documents or entitlement to services. No signed financing/legal review. All full source/AV/native parity/independentlearner/account/field/currentlaw/overall 10 remain open.
