D 149 | Map the issues, not a clearance

PRIVATE FICTIONAL classroom workbook. Shares are counts, not money. Original three-route exercise and quiz retained. No formation, filing, bank contact, transfer or investment.

Original uniform exchange	Old ordinary shares: founder 60 / investor 40, total 100. Two new ordinary shares per old gives founder 120 / investor 80, total 200. Empty receiving-company toy, no other shares, fresh money, fees, options or CCPS. Modeled percentages stay 60% / 40%.
What unchanged means	Uniform positive ratio cancels in percentages only within this denominator. Counts and percentage identities do not establish economic rights, voting/control, tax neutrality, residence, legal eligibility, valuation or approval. No real transaction terms supplied.
Separate existing-holder case	Same exchange plus 50 stipulated pre-existing ordinary shares in receiving company: total 250. Founder 48%, exchanging investor 32%, legacy holder 20%. Founder/investor remain 60/40 of the exchanged block, not the whole company. No cash implied.
Separate unequal-ratio case	Founder ratio 2 / investor ratio 3 gives 120 / 120 = 240 new shares, 50% / 50%. No legacy shares in this case. It tests a changed assumption, not a fairness opinion or a recommended exchange ratio.
Whole shares and fractions	Positive ratios can create fractional modeled entitlements. The workbook preserves them and reports whether both counts are whole; it does not invent a legal fractional-share or cash-in-lieu mechanism. Zero total old shares or ratio is invalid. Static baseline prose needs revision for edited scenarios.
Evidence and action	Two-page route map follows; actual evidence / reviewer / accepted owner / authority / stop plan stays blank. Citizenship and incorporation do not by themselves establish residence. Current-law application unscored. No counsel opinion, solicitation, tax filing, account, learner flow or spend.

Inputs | Three cases, not one cap table

Shaded cells editable. Original counts plus separate existing-holder and unequal-ratio sensitivities. Counts ordinary shares; ratios new per old. No real holder records.

Old founder ordinary shares	60.00
Old investor ordinary shares	40.00
Common new-shares-per-old exchange ratio	2.00

Separate existing receiving-company shares	50.00

Separate founder new-shares-per-old ratio	2.00
Separate investor new-shares-per-old ratio	3.00

Old-share numeric gate	1.000000
Uniform-exchange numeric gate	1.000000
Separate existing-holder numeric gate	1.000000
Separate unequal-ratio numeric gate	1.000000

Integer old and pre-existing counts required. Ratios positive, not necessarily integers. Fractional output is retained as modeled entitlement and visibly flagged; not rounded into a legal issuance. Neither a gate nor a whole-number flag verifies rights, authority, residence, control, pricing, consent, reporting or tax.

Uniform exchange | Empty receiving-company toy

Conditional classroom arithmetic only. Shares counts and labeled fractions, not money. Cases independent. No legal or tax verdict.

Total old shares	100.000000
Founder fraction before	0.600000
Investor fraction before	0.400000
Founder new modeled entitlement	120.000000
Investor new modeled entitlement	80.000000
Total new modeled entitlements	200.000000
Founder fraction after	0.600000
Investor fraction after	0.400000
Founder percentage-point change	0.000000
Investor percentage-point change	0.000000
Allocation identity; must be zero	0.000000
Fraction sum less one; must be zero	0.000000
Both entitlements whole? 1=yes,0=no	1.000000

Baseline 100 / .6 / .4 / 120 / 80 / 200 / .6 / .4 / 0 / 0 / 0 / 0 / 1. Uniform ratio cancels; no other receiving-company shares in this case. Fraction flag uses numeric tolerance 1 e-7, not legal rounding. Zero shareholder allowed; zero total/ratio invalid. Rights, voting and tax continuity not established.

Existing holder | Same block, different denominator

Conditional classroom arithmetic only. Shares counts and labeled fractions, not money. Cases independent. No legal or tax verdict.

Founder new modeled entitlement	120.000000
Investor new modeled entitlement	80.000000
Separate pre-existing receiving-company shares	50.000000
Total including pre-existing shares	250.000000
Founder company fraction	0.480000
Exchanging-investor company fraction	0.320000
Legacy-holder company fraction	0.200000
Founder fraction inside exchanged block	0.600000
Exchanging block fraction of company	0.800000
Company fraction identity; must be zero	0.000000
Both exchange entitlements whole? 1=yes	1.000000

Baseline 120/80/50/250/.48/.32/.20/.60/.80/0/1. Legacy 50 is a separate fictional existing stake, not a new round or cash payment. Within-block 60/40 is not company-wide 60/40. No preference/option/other instrument, beneficial-owner inference, tax, right or approval asserted.

Unequal ratios | Change an assumption explicitly

Conditional classroom arithmetic only. Shares counts and labeled fractions, not money. Cases independent. No legal or tax verdict.

Founder new modeled entitlement	120.000000
Investor new modeled entitlement	120.000000
Total new modeled entitlements	240.000000
Founder fraction after	0.500000
Investor fraction after	0.500000
Founder percentage-point change	-10.000000
Investor percentage-point change	10.000000
Fraction identity; must be zero	0.000000
Both entitlements whole? 1=yes	1.000000

Baseline 120/120/240/.5/.5/-10/+10/0/1. Separate case without legacy shares. Ratios 2 and 3 stipulated, not fair-value calculation or approved deal. Restoring equal ratios restores original ownership within exchanged block. It does not restore legal rights or tax treatment by calculation.

Route map 1 of 2 | Investor flows

Private fictional issue-map. No actual investor, fund, startup, sector or transaction date. Arrows label proposed flow; they are not bank instructions.

Route A | US -> IFSC -> India	US investor -> subscription in IFSC fund -> proposed investment in Indian startup. Separately map eventual portfolio proceeds -> fund -> investor. No amount, bank account, date, instrument or permission supplied. Do not relabel investor country as verified tax/FEMA residence.
Route A | Evidence gaps	Identify investor legal form/residence/beneficial owner; fund/FME/scheme registration and type; proposed startup sector, instrument, direct/indirect control and money path. Scheme terms, category references, eligibility, entry route/caps, pricing, distribution/tax/treaty and reporting require scoped current evidence.
Route B | US -> India directly	US investor -> proposed Indian startup instrument, without fund intermediary in this sketch. Returns -> investor separately. Compare the actual actors, beneficial ownership, sector, issue-versus-transfer, listed status and repatriation basis. Absence of drawn fund does not remove conditions.
IFSC source boundary	Selected July 2025 IFSCA regulations 18 and 30 distinguish venture-capital and restricted schemes, including category references. Not automatic domestic SEBI terms or tax neutrality. Official current index now lists September 10, 2026 consolidation and second amendment; their operative text is not cleared by this lab.
Pricing review branch	RBI foreign-investment direction 7.14 and 8.1-8.11: direction, issue/transfer, listed status, swaps, non-repatriation/SEBI exceptions and certificate validity differ. Selected swap 8.4 names specified merchant/investment bankers, not any generic valuer. No universal DCF or universal price floor/ceiling.
Proposed stop condition	If residence, beneficial ownership, sector, instrument, control, dates or flows are unknown, leave them unknown and pause the affected real action. Proposed legal/tax/valuation/AD reviewer roles are not people who accepted work. Numeric arithmetic is not a go decision.

Route map 2 of 2 | Exchange both legs

Private fictional issue-map. Indian holders -> foreign holding-company shares and Indian-company shares -> foreign holder. No executed swap, rights continuity or tax clearance.

Route C | Two legs	Indian holders surrender/transfer Indian startup shares -> foreign holding company; foreign holding company issues/transfers its shares -> holders. Confirm issue versus transfer on each leg, exact legal entities, residence, owner/control before/after, instrument and dates. Do not assume all Indian holders are resident individuals or entities.
Holder-specific outbound branch	RBI OI selected 21/22/23/24 separates Indian entities, resident individuals, other persons and IFSC investments. Both swap legs need applicable FEMA compliance. January 2025 JSA commentary is practitioner analysis, not current authorization or a substitute for operative schedules/exceptions. No blanket individual eligibility conclusion.
Layers and identifiers	Selected OI 20(2) is a conditional layered-structure restriction tied to defined subsidiary/control, not every return-to-India structure being illegal. Full rules/exceptions needed. OI 16(3): UIN is a record identifier, not RBI approval. Reporting and payment rules remain separate from substantive permission.
Rights and tax open	Original 100 -> 200 share arithmetic does not preserve CCPS/preferences, ESOP replacement, voting, consents, IP, contracts or treaty outcomes by itself. Budget 2024 memorandum Section 56(2)(viib) passage describes proposed AY 2025-26 sunset, not enacted/current all-tax advice, old exposure waiver or swap capital-gains clearance. No FY inferred from AY.
Proposed evidence handoff	For every leg record source/page/date/effective scope, actor/instrument/direction, valuation/reviewer, consent and reporting gaps. Resolve conflicts before a real recommendation. No actual tax/counsel reviewer, AD confirmation, valuation certificate or accepted owner supplied.
Stop and transfer check	Close notes: explain why uniform 3 changes counts to 180/120 but not 60/40; existing 50 then gives company fractions 180/350 and 120/350; unequal 2/3 instead gives 50/50. Explain why none establishes legal go/tax neutrality. No actual learner answers or independent review observed.

Evidence | Selected sources, not a current-law opinion

Seven URLs/four organizations: regulator directions/text, official explanatory proposal/index and practitioner analysis. Not seven independent legal opinions or full source coverage.

RBI OI | April 1, 2026 label	https://rbi.org.in/scripts/BS_ViewMasDirections.aspx?id=12710 | Selected 12, 16(3), 17, 20(2), 21(1), 22-24 read: pricing policy, UIN, reporting, layers, holder-specific routes. Not all underlying rules/schedules, footnotes, current applications or exceptions. No foreign-account opening or bank contact.
RBI foreign investment	https://www.rbi.org.in/Scripts/BS_ViewMasDirections.aspx?id=11200 | Visible June 15, 2026 label. Direct written 7.14/8.1-8.11 read. Direction/issue/transfer/swap/exception/certificate scope, not current case clearance. No diagrams or full annexures read.
RBI payment/reporting	https://www.rbi.org.in/Scripts/BS_ViewMasDirections.aspx?id=11723 | June 13, 2026 label. Selected opening and Schedule I payment provision read; swap consideration included. Not entire reporting schedules or approval; no generalized transaction-specific deadline calculation.
IFSCA and current index	https://ifsca.gov.in/CommonDirect/ViewFile?id=21626bde60601ef44a0ed022017f9e07&fileName=IFSCA__Fund_Management__Regulations__2025__Amended_up_to_July_30__2025__20250818_0105.pdf | Selected 18/30 only read. https://ifsca.gov.in/home/NewSection | Returned index shows September 10, 2026 consolidation / second amendment; listing is not their operative text or verification every later circular checked.
Proposal and practitioner	https://www.indiabudget.gov.in/budget2024-25/doc/memo.pdf | Selected Section 56 sunset passage only, not enacted/current all-tax law. https://www.jsalaw.com/wp-content/uploads/2025/01/JSA-Prism-MA-January-2025-Share-Swap.Final43.pdf | Returned written analysis read, not diagrams/linked cases. Its dated permission/valuation language not adopted as universal/current rule; operative text and case counsel needed.
Validation bounds	Authored arithmetic, not fair exchange ratio, tax/legal advice, actual counsel/AD confirmation, independent learner, native Excel/Sheets parity, full PDF/AV/current law coverage or overall 10. Original source figures are fictional. Actual entity / evidence/authority/accepted owner plan blank. No incorporation, filing, transfer, account, solicitation, investment, learner flow or spend.

Actual plan | No real clearance or accepted owner

Blank actual source/evidence/authority plan. A proposed reviewer role is not an actual person who accepted work. No real investor or transaction supplied.

Leg / actor	Residence / owner	Instrument / flow	Source / scope	Gap / reviewer	Authority / owner	Stop / decision

No completed legal/tax review, valuation, bank confirmation, filing, formation, share transfer, account, solicitation, investment or actual learner record. Blank is unknown, not no condition or implicit permission. Keep any real source/audience restrictions; no new real-world activity authorized.

Failure log | Authored arithmetic only

No observed learner, counsel, bank, source-media, legal-clearance or overall 10 outcome.

1	PASS: 37 baseline formulas independently recomputed.
2	PASS: 15 changed input sets plus restored baseline.
3	PASS: 24 invalid inputs/888 family-isolation checks.
4	PASS: 6 broken references/6 checks.
5	PASS: 6 boundaries;zero holder,legacy,equal ratio,fraction.
6	PASS: uniform/existing-holder/unequal families isolated.
7	PASS: fractional modeled entitlements retained and flagged.
8	PASS: actual evidence/authority/accepted-owner rows blank.
