D165 | Cash is not a paper rollover

FICTIONAL offline exit lab. Crore except labeled fractions/multiples. No buyer, transfer rights, actual transaction, election, notice or recommendation.

Three stipulated offers	9% stake; strategic company equity 1200/cost 5% of fund gross gives 108 gross/102.6 net. Secondary 800/cost 2% gives 72/70.56. Continuation 900 gives 81 before separately entered costs. Same cash rights; no debt/preferences/tax/carry/escrow assumed.
Fund denominator	Paid-in 200; prior distributions 80; mark 1000 gives stakeNAV 90; otherNAV 30. Before DPI.4/TVPI 1. Secondary closes, sold NAV removed and 70.56 immediately distributed: DPI.7528/TVPI.9028. Higher cash DPI can coexist with lower TVPI.
Cash receipt versus distribution	Retained sale cash is fund NAV, not LP distributions. Rollover is paper NAV, not cash DPI. Baseline continuation 50%cash/50%roll: 40.5 cash/40.5 roll, DPI.6025/TVPI.955 if cash fully distributed and toy mark retained. No fairness or entitlement conclusion.
No unique ranking	Highest indication may fail to close. Probability, failure net cash and failure time stay blank. Expected discounted cash is undefined until every optional assumption is supplied. Six-month success and 10% annual discount are fictional sensitivity inputs, not forecast or price opinion.
Rights and conflicts	9% holder cannot promise whole-company sale/drag. Direct company shares, fund LP interests and GP-led transfers differ. ROFR/ROFO timing, indirect transfers, consents and noncash matching depend on actual documents. No SPV bypass or universal strip-sale protection.
Independent attempt	Change stake, prices, costs, paid-in, mark, retention, roll fraction and timing; explain cash/NAV reconciliation before checking. Actual parties/rights/reviewer/permissions blank. No outreach, LP notice, fund/account action, filing, investment or spend.

Inputs | Offers, not executable bids

Crore. Fractions 0..1. Cash fractions describe old-fund receipt/distribution, not a particular LP election. All inputs invented.

Fund stake fraction	0.09
Strategic whole-company equity offer	1200.00
Strategic costs / fund gross	0.05
Secondary company-equivalent equity price	800.00
Secondary costs / fund gross	0.02
Continuation company-equivalent equity price	900.00
Continuation costs / fund gross	0.00
Total LP paid-in capital	200.00
Prior cash distributed to LPs	80.00
Reference company equity mark	1000.00
Other unrealized NAV, unchanged	30.00
Secondary net cash retained at fund fraction	0.00
Continuation net value received as CASH fraction	0.50
Continuation CASH retained at fund fraction	0.00
Annual discount rate, sensitivity only	0.10
Success closing months, sensitivity only	6.00

OPTIONAL success probability, blank unknown	
OPTIONAL failure NET proceeds, blank unknown	
OPTIONAL failure receipt months, blank unknown	

Core numeric/domain gate, not rights clearance	1.000000
Optional expectation assumptions complete/valid	0.000000

Blank optional cells keep expectations undefined, never zero-impute unknowns. Zero stake allowed; mark and paid-in positive for ratios. Rate/time nonnegative. No probabilities or actual valuations inferred. Gate verifies arithmetic domains only.

Proceeds | Three separate offers

Fictional conditional arithmetic. Crore except fractions/multiples. No legal rights or executable offer implied.

Strategic fund gross	108.000000
Strategic selling costs	5.400000
Strategic fund net	102.600000
Secondary fund gross	72.000000
Secondary selling costs	1.440000
Secondary fund net	70.560000
Continuation gross	81.000000
Continuation costs	0.000000
Continuation net value	81.000000
Reference stake NAV	90.000000
Secondary discount against company reference	0.200000

Baseline strategic 108/5.4/102.6, secondary 72/1.44/70.56, continuation 81 gross/net with zero stipulated costs. Discount 20% of 1000 reference, not 25% upside denominator or verified market discount. Prices stipulated equity values, not enterprise values. No class preferences, debt, tax, carry, escrow or uncertainty modeled.

Fund metrics | Remove the sold NAV

Fictional conditional arithmetic. Crore except fractions/multiples. No legal rights or executable offer implied.

Before cash DPI	0.400000
Before TVPI	1.000000
Secondary net cash retained by fund	0.000000
Secondary net cash distributed to LPs	70.560000
Secondary post-sale cumulative distributions	150.560000
Secondary remaining fund NAV	30.000000
Secondary post-sale DPI	0.752800
Secondary post-sale TVPI	0.902800
Secondary DPI increase	0.352800
Secondary TVPI change	-0.097200
Cash plus NAV bridge residual, must be zero	0.000000

Baseline before.4/1; after DPI.7528/TVPI.9028; DPI gain.3528, TVPI loss.0972. Sold 90 NAV removed, never retained along with sale cash. If all 70.56 cash retained, DPI remains.4 while TVPI.9028 unchanged. Retained cash is included at stipulated face value; no mark/timing/legal assertion.

Cash elections | Fund cash versus LP cash

Fictional conditional arithmetic. Crore except fractions/multiples. No legal rights or executable offer implied.

Continuation net total value	81.000000
Continuation cash received at fund	40.500000
Continuation paper rollover NAV	40.500000
Continuation cash retained at fund	0.000000
Continuation cash distributed to LPs	40.500000
Continuation cumulative distributions	120.500000
Continuation remaining NAV, includes retained cash	70.500000
Continuation post-transaction DPI	0.602500
Continuation post-transaction TVPI	0.955000
Cash and paper reconciliation residual	0.000000
Post fund value bridge residual	0.000000

Baseline 81 total, 40.5 cash/40.5 paper, 40.5 distributed; DPI.6025/TVPI.955. All-roll DPI.4; all-cash fully distributed DPI.805; TVPI.955 in both under toy constant-value assumptions. All-cash retained does not raise DPI. Actual sell/roll elections, costs, fair values, old/new carry, sideletters and distribution rules not known.

Price sensitivity | Different marks and cash

Secondary company-price factors 50%/80%/100% of current reference. Stipulated prices, not forecast probabilities or discounts.

Price / reference	Company price	Fund gross	Fund net	LP new cash	Post DPI	Post TVPI
0.5	500.000000	45.000000	44.100000	44.100000	0.620500	0.770500
0.8	800.000000	72.000000	70.560000	70.560000	0.752800	0.902800
1	1000.000000	90.000000	88.200000	88.200000	0.841000	0.991000

At baseline 80% reference row reproduces 800/72/70.56/.7528/.9028.100% price still loses 2% costs: TVPI.991 rather than 1.0. Retention changes DPI, not total value here. No historical discount estimate, executable bid, tax/carry or liquidity guarantee.

Decision cases | Unknown probabilities stay unknown

Optional expectation cells require explicit probability, failure NET cash and failure time. No automatic valuation ranking.

Success fund net proceeds, secondary	70.560000
Success PV, stipulated time/discount	67.276320
Optional failure PV	#N/A
Optional probability-weighted NET cash	#N/A
Optional probability-weighted PV	#N/A

BASELINE #N/A in optional outputs is intentional UNKNOWN, not an error to fill with zero. Supply all three optional inputs only for an explicitly hypothetical sensitivity. Failure input is NET fund cash, not company equity value; failure case must include any relevant broken-deal cost. No retained-cash/distribution timing, tax/carry or alternative-offer expected value ranking modeled.

Rights | No wrapper bypass

Written source distinctions, not contract drafting, counsel or actual Indian transfer clearance.

Instrument first	Identify issuer/fund jurisdictions, share class and cash rights. Company shares differ from LP interests, fund asset transfers and indirect vehicle ownership.9% stake is not unilateral authority for whole-company sale or drag.
ROFR versus ROFO	ROFR generally concerns matching a qualifying third-party offer. ROFO generally gives an initial offer opportunity before outside marketing. Exact trigger, notice, price/material-terms match, time, tail and repeat rights depend on actual contract.
Indirect ownership	Review transfer/change-of-control definitions, permitted transfers, look-through, anti-circumvention, tag/drag/consent, confidentiality and securities/tax rules. Layering SPVs never establishes a bypass; proportional strips do not remove all adverse selection.
Fund end date	2017 vintage/18 monthsremaining/used extension are fictional. Verify actual term/LPA/PPM/law, documents, reviewer and alternatives. No new extension, continuation, liquidation route or promised timeline established.
Source limits	Bedell 2014 US real-estate comparison and Cummings US share-transfer commentary support conceptual differences, not Indian procedures, stated typical windows, tax or enforceability. No actual issuer/fund documents or case-specific rules checked.
Stop before action	Real buyer/LP/company/rights/consent blank. No notice, negotiation, document delivery, signature, trade, filing, account, fund transfer or spend. This workbook is a private learning artifact.

Conflicts and draft | Private election-note outline

ILPA May 2023 industry guidance read in full returned text. Context-dependent recommendations, not Indian law or actual consent.

Rationale and process	Explain continuation versus genuine alternatives, asset outlook/capital/exit plan, price validation and competitive bids. Identify GP seller/buyer roles, advisor incentives, LPAC bidder conflicts/recusals and expenses. Fairness opinion is a safeguard, not proof of price or universal mandate.
Different permissions	LPAC conflict waiver is not blanket LPA amendment or transaction approval. Check actual mandate, voting thresholds, relevant law, side letters and independent advice. Guidance recommends LPAC review/time and an in-camera session; no action performed.
Time and information	Guidance says no less than 30 calendar/20 business days for LP election, accounting for bank holidays and extra institutional reviews; more where possible. Not universal statutory deadline. Symmetry of information must respect confidentiality.
Economics and default	Status quo guidance: no increase fee rate/base or carry, no reduced hurdle/GP-favorable waterfall, no carry crystallization for rolling LPs. It recommends nonresponse liquidate rather than forced roll; actual documents/authority control, no automatic election applied here.
Draft before reference	Privately outline placeholders: rationale, approved price/costs, cash/roll options, new versus old economics, follow-on dilution, deadline/timezone/holidays, documents, questions, defaults and conditions. Explain fund cash versus LP distributions and paper NAV. No recipient or sending approval.
Conflicting source examples	Industry Ventures Nov 2024 explicitly includes examples WITHOUT rollover. Do not turn ILPA recommendation into universal deal entitlement. US RIA thresholds, 3-9 month timeline and IMD market/SEC/fraud/statistics/2026 listing forecasts not independently validated or Indian rules.

Actual evidence | Real rights and people blank

Blank unknown, not waived, received, approved, sold or rolled. No real transaction or learner evidence.

Case / date	Instrument / rights	Offer / terms	Cash / NAV	Conflict / owner	Reviewer / consent	Next safe check

No actual buyers, fund/issuer documents, legal/tax review, LP choice, election/notice/send authority or executable price established. No sourceAV, native Excel/Sheets parity, independent learner/account/field/current-law validation or overall 10.

Evidence | Sources, not executable liquidity

Six URLs/six publishers: industry association guidance, practitioner analysis, vendor disclosures and US legal commentary.

ILPA primary guidance	May 2023 ContinuationFunds complete returned text read, including defaults, economics, sideletters, LPAC and fees. SourcePDF 14 pages recovered; pages 9-11 pixels checked. Guidance itself says unique deals may not fit every recommendation. Not current Indian law.
IMD practitioner	22 Apr 2026 ReferenceCapital collaboration read. Useful distinction: seller liquidity transfers risk while assets stay private. Market volumes/discounts/concentration, anticipated 2026 listings, SEC/vacatur/fairness-law and fraud/legal claims not independently checked. Charts not fully inspected.
Industry Ventures	27 Nov 2024 returned written article read. Varied structures/elections/economics, including no-roll examples.3-9 month/RIA/specificdeals/marketstatistics and figures not independently verified. Not measured India execution or available buyer demand.
Forge vendor	Current public homepage read. Its own disclaimer: ForgePrice limitedinputs/informational, not necessarily tradable; no audited/guaranteed accuracy. Last trade can include different share classes or fund units and settlement after agreement. Ticker dated 3 Nov 2026, not current executable offers or user access.
Transfer commentary	Bedell 19 Nov 2014 commercialrealestate and Cummings USsharetransfer article returned text read. Cummings returned page shows 13 Nov 2026 update. Definitions aid issue spotting, not authority to adopt template, typical timeline, US tax, Indian law or bypass restrictions.
Remaining boundaries	Native authored arithmetic/recalc only. No full AV/diagrams, Excel/Sheets parity, actual documents/buyer/fund-law/tax review, independent learner/account/field or overall 10. No outreach/LP notice, election, transfer, registration, investment, account, calendar or spend.
