D 148 | Reconcile amounts, hold the transfer

PRIVATE FICTIONAL administrator practice. Amounts millions. No actual call, report, bank details, due date, investor data, filing or transfer.

Original call case	Fund commitments 400, prior paid 100, new call 8 investment+3 stipulated fee+1 expense=12; all inside commitment. Unfunded 300->288. LP 10%: commitment 40, prior paid 10, investment.8/fee.3/expense.1, total 1.2, unfunded 30->28.8. Fee period/base/rate/approval still unresolved.
Three different ledgers	Original call, supplemental transaction classification, and quarterly NAV/metrics are separate cases. Do not append the original call to quarterly NAV or treat all rows as one investor history. Do not infer 10% ownership always equals 10% of unfunded.
Supplemental notice toy	Opening LP paid 10, distributions 2, unfunded 30. Five rows: .8 investment call; .3 fee inside fund but OUTSIDE commitment; -.2 excess investment capital return; .4 recallable distribution; .05 outside-fund subsequent-close interest paid. Negative contribution is not a distribution.
Supplemental checks	Inside-fund contribution.9/distribution.4, net called.5; outside-fund net.05, totalnet called.55. Unfunded 30-.8+.2+.4=29.8. Inside-fund cumulativepaid 10.9/distributions 2.4. Classifications and impact are stipulated, not universal contractual treatment. No actual performance metrics inferred from outside-fund conduit flow.
Quarterly valuation toy	Snapshot 150 portfolio+10 cash+2 receivables-12 liabilities=150 aggregate NAV. Separate same-scopebridge 130+20 contributions-10 distributions+15 gain-3 fees-2 expenses=150. Differencezero at baseline, not an audit. Units absent, so no per-unit price. Already-accrued liabilities not deducted twice.
Metrics and authority	Independent same-investor-scope paid 120/distributions 30/net NAV 150 -> DPI.25, RVPI 1.25, TVPI 1.5. No dated IRR. Notice placeholders remain unverified. Arithmetic, logos, email access, template adoption or a phone call alone cannot prove legal authority or guarantee payment safety.

Inputs | Four independent numeric families

Shaded cells editable; all millions except LP fraction. Original call is all inside commitment. No invented fee basis, bank details, governing deadline or unit count.

Original call fund commitments	400.00
Original call prior paid-in	100.00
Original investment call	8.00
Original stipulated allocated management fee	3.00
Original stipulated partnership expense	1.00
Original same-basis LP allocation fraction	0.10

Independent snapshot portfolio fair value	150.00
Independent snapshot cash	10.00
Independent snapshot receivables	2.00
Independent snapshot liabilities already accrued	12.00

Inputs | Four independent numeric families

Shaded cells editable; all millions except LP fraction. Original call is all inside commitment. No invented fee basis, bank details, governing deadline or unit count.

Independent bridge opening net NAV	130.00
Independent bridge contributions	20.00
Independent bridge distributions	10.00
Independent bridge fair value gain; signed	15.00
Independent bridge fees not already deducted	3.00
Independent bridge other expenses not already deducted	2.00
Independent metric cumulative paid-in	120.00
Independent metric cumulative distributions	30.00
Independent metric net residual NAV	150.00
Original call numeric gate	1.000000
Snapshot numeric gate	1.000000
Bridge numeric gate	1.000000
Independent metric numeric gate	1.000000

No real fund data supplied. Family gates isolate missing/text/negative assumptions. Negative computed NAV and bridge gain retained. Original call cannot exceed available commitment in this no-recall/no-transfer toy. These gates do not verify valuation, fee entitlement, authorization or accounting.

Original call | Fund and one LP

Conditional fictional arithmetic. Millions except labeled ratios. Static baseline prose must be revised before presenting an edited scenario.

Total original fund call	12.000000
Fund prior unfunded	300.000000
Fund current unfunded	288.000000
LP commitment	40.000000
LP prior paid-in	10.000000
LP investment allocation	0.800000
LP stipulated fee allocation	0.300000
LP expense allocation	0.100000
LP total call	1.200000
LP prior unfunded	30.000000
LP current unfunded	28.800000
LP allocation identity; must be zero	0.000000
LP unfunded identity; must be zero	0.000000

Baseline fund 12/300/288; LP 40/10/.8/.3/.1/1.2/30/28.8. All calls reduce commitment by stipulation. Same-basis 10% allocation not a universal ownership/unfunded rule. Fee 3 is supplied, not verified from period/base/rate/approval; no actual notice issued.

Transactions | Classification is not commitment impact

SEPARATE LP toy: opening paid 10, distributions 2, unfunded 30. B signed contribution, C distribution, D unfunded decrease, E increase, F inside fund 1/outside 0. All numeric inputs editable.

Stipulated row	Contribution	Distribution	Unfunded -	Unfunded +	Inside 1/0	Numeric gate
Investment call	0.80	0.00	0.80	0.00	1.00	1.000000
Fee: inside fund, outside commitment	0.30	0.00	0.00	0.00	1.00	1.000000
Return excess investment capital	-0.20	0.00	0.00	0.20	1.00	1.000000
Recallable distribution	0.00	0.40	0.00	0.40	1.00	1.000000
Subsequent-close conduit interest	0.05	0.00	0.00	0.00	0.00	1.000000

G checks numbers only, not classification or allowed impact. Negative contributions reduce paid-in, not increase distributions. Recallable distributions increase distributions AND unfunded. Outside-fund conduit cash excluded from inside-fund totals. Whether a fee reduces commitment is separate from inside/outside fund; terms govern. Labels are baseline stipulations, not inferred from sign.

Transaction roll | One separate LP, not the fund

Conditional fictional arithmetic. Millions except labeled ratios. Static baseline prose must be revised before presenting an edited scenario.

Inside-fund contributions; signed	0.900000
Inside-fund distributions	0.400000
Inside-fund net called / (distributed)	0.500000
All included net called / (distributed)	0.550000
Outside-fund net; excluded from fund aggregate	0.050000
Unfunded commitment after explicit impacts	29.800000
Inside-fund cumulative paid-in	10.900000
Inside-fund cumulative distributions	2.400000
Net cash identity; must be zero	0.000000

Baseline.9/.4/.5/.55/.05/29.8/10.9/2.4/0. Opening balances are fixed toy assumptions independent of Inputs. No authority from totals; negative resulting unfunded/paid-in remains a visible exception for investigation. Not actual fund total, official template, performance metric calculation or LP statement.

NAV | Aggregate is not a per-unit price

Conditional fictional arithmetic. Millions except labeled ratios. Static baseline prose must be revised before presenting an edited scenario.

Total snapshot assets	162.000000
Aggregate snapshot NAV	150.000000
Same-scope bridge less snapshot NAV	0.000000

Baseline assets 162, NAV 150, bridge-minus-snapshot 0. No unit count exists, so no price/unit. Do not subtract initial capital cost as a second NAV deduction or accrue the same liability twice. Different dates/scopes invalidate comparison even if totals match. Negative computed NAV is not suppressed.

Bridge | Net asset roll without double debit

Conditional fictional arithmetic. Millions except labeled ratios. Static baseline prose must be revised before presenting an edited scenario.

Bridge closing net NAV	150.000000
Net movement excluding opening NAV	20.000000
Snapshot less bridge; separate gate	0.000000

Baseline 150, 20, 0. Contributions 20 and distributions 10 belong only to this quarterly toy, not original call 12 or transaction grid. Fees 3/expenses 2 are stipulated period charges not already deducted; no repeat liability subtraction. No audit, valuation model, foreign exchange/tax/transfer/in-kind or full accounting.

Metrics | Same investor, scope and net basis

Conditional fictional arithmetic. Millions except labeled ratios. Static baseline prose must be revised before presenting an edited scenario.

DPI: distributions / actual contributions	0.250000
RVPI: net residual NAV / actual contributions	1.250000
TVPI: total net value / actual contributions	1.500000
DPI plus RVPI less TVPI; must be zero	0.000000

Baseline.25/1.25/1.5/0. Separate cumulative toy, not linked to transaction roll or quarter bridge. Actual investor contributions include fees. Zero denominator undefined, not 0 multiple. No dates/terminal timing -> no annualized IRR; NAV not cash returned; not portfolio gross MOIC.

Notice review | Private incomplete checklist

NOT ISSUED. Not an LP letter, approved instruction, completed verification, default notice, contract deadline or bank account.

Identity and scope	[fund/legal entity not supplied]; [LP identity not supplied]; [notice ID not supplied]; [fee period/base/rate/approval not supplied]. Original LP 1.2 arithmetic is fictional, not an amount payable by an identified investor.
Purpose and reconciliation	Record investment/fee/expense components, prior/current unfunded, inside/outside fund and explicit commitment impact. Keep negative contribution distinct from distribution; never use net cash alone to infer purpose or commitment movement.
Payment and due date	[verified bank details not supplied]. [due date to be verified against governing documents and applicable business-day calendar]. No invented 10-business-day rule, account number, transfer instruction, signature or cure/default notice.
Independent route	If authorized in a real workflow, verify changes using an independently established route, not the reply address or number supplied only in an unverified notice. FBI 2020 recommendation: in person or known phone. No security control is infallible; confirmation does not itself establish payment authority.
Scope of industry guidance	ILPA September 2025: first deliveryQ 12027; performance-template adopters funds commencingQ 12026, non-adoptersQ 12027. LPA/accounting and relevant jurisdiction still govern. Reporting guidance January 2025 has different transition and timing, not one global legal deadline.
Review before real use	Valuation support, scope/date, fee entitlement, side letters, authorized recipient/words, reviewer, actual bank verification and governing due-date evidence unresolved. Actual records and accepted owner remain blank; no actual report, payment, filing, contact or learner test performed.

Evidence | Scope is part of the answer

Seven URLs/three organizations: association guidance/definitions, vendor explanation and government security advice. Not seven independent studies or current legal advice.

New ILPA call guidance	https://ilpa.org/wp-content/uploads/2025/09/ILPA-Suggested-Guidance-2025-Final.pdf | Selected implementation summary and VI-XII transaction mapping/description/optionality/negative contribution/verification limits, not full PDF or official workbook. Disclosure standard does not verify GP calculations.
Definitions and listing	https://ilpa.org/wp-content/uploads/2025/09/Capital-Call-Template-Definitions.pdf | Returned transaction definitions read, including inside/outside, fees, returns, recallability, conduitinterest. https://ilpa.org/industry-guidance/templates-standards-model-documents/ilpa-templates-hub/ilpa-capital-call-distribution-template/ | Returned written listing, not timeline image/downloads.
NAV source limitation	https://carta.com/learn/private-funds/management/fund-performance/nav/ | October 30, 2024 visible publication; written article body/formula read, not images/linked report. Its cost-subtraction opening is not adopted. Published formula is per-share; lab explicitly separates aggregate assets-minus-liabilities from per-unit NAV.
Payment-route evidence	https://www.ic3.gov/PSA/2020/PSA200406 | April 6, 2020 complete returned PSA read: compromised legitimate email, changed payment destination and known-number/in person verification. Historical losses not current statistics. No actual security assessment/contact/payment or claim controls guarantee safety.
Reused reporting/metrics	https://ilpa.org/wp-content/uploads/2025/01/ILPA-Reporting-Template-v.-2.0-Suggested-Guidance.pdf | D 147 selected reporting/conformity/estimates/optionality/fees/verification limits reused, not full PDF. https://ilpa.org/wp-content/uploads/2025/04/ILPA-Performance-Template-Definitions-Granular-Methodology-v1.1.pdf | D 145 selected investor contributions/netTVPI/netIRR/gross definitions reused, not full PDF.
Limits and transfer	Not exhaustive latest version/legal/accounting/valuation search. Close notes: outside-commitment fee still contributes investor cash; return excess reduces paid; recallability increases unfunded; zero paid leaves ratios undefined. Fullsource/AV/nativeExcel/Sheets/independentlearner/account/field/legal/tax/overall 10 remain open.

Actual plan | Evidence and authority remain blank

No actual fund, LP, bank verification, notice, report, valuation, deadline, learner consent or accepted owner.

Claim / entity	Source / cutoff	Reconciliation	Clause / gap	Owner / acceptance	Authority / scope	Stop / review

No account numbers, actualLP data or instructions to pay. Arithmetic is not bank verification, contract opinion, reporting acceptance or authority. No real notice/letter/report/filing/default notice/transfer/outreach/learner flow or spending.

Failure log | Authored arithmetic only

No independent learner, actual administrator, bank verification, account flow, source-media coverage or overall 10.

1	PASS: 41 baseline formulas independently recomputed.
2	PASS: 28 changed input sets plus restored baseline.
3	PASS: 24 invalid inputs/984 family-isolation checks.
4	PASS: 6 broken references/6 checks.
5	PASS: 7 boundaries;zero paid-in,NAV,LPfraction,call cap.
6	PASS: call,NAV,bridge,metrics and row gates isolated.
7	PASS: signed contribution and explicit commitment impacts.
8	PASS: actual evidence/permission/accepted owner rows blank.
